ABOUT ME

I am a Systems and Network Engineering student and developer focused on web development and interface design, with fast learning abilities and a strong focus on creating functional solutions that improve user experience.

WORK EXPERIENCE

Customer Service

Floristería Carmen
2020 - 2025

Provided personalized customer service, order management, sales control, and operational support within the business, strengthening communication, organization, and responsibility skills.

TECHNICAL SKILLS

Web Development & Interface Design

Web development using HTML, CSS, and JavaScript. Linux command-line management. Network and system diagnostics. UI/UX design fundamentals. Social media content management to increase engagement and digital platform activity.

SOFT SKILLS

Interpersonal Competencies

Teamwork, effective communication, attention to detail, fast learning, organization and responsibility, adaptability, problem-solving, critical thinking, and proactivity.

These are some of the projects I have designed, collaborated on, and developed both individually and as part of a team.

To explore more details, review the source code, and discover additional work, you can visit my GitHub profile.

Juan Carlos Díaz Quintanilla
